**A range of spin-crossover temperature  $T_{1/2} > 300$  K results from out-of-sphere anion exchange in a series of ferrous materials based on the 4-(4-imidazolylmethyl)-2-(2-imidazolylmethyl)imidazole (trim) ligand,  $[\text{Fe}(\text{trim})_2]\text{X}_2$  (X = F, Cl, Br, I): Comparison of experimental results with those derived from density functional theory calculations**
